4. A mask, gloves and an apron.
5. He uses disposable utensils to eat with and the equipment in the room is only used by him.

Activity 4:

We are trying to stop the infection spreading to other patients.
It's not dangerous, but we have to be careful.
The first thing is to clean your hands, before you enter the room.
You also have to put on a disposable apron.
Put on some single use gloves.
The final thing is to put on a disposable mask.
